

Dear Parents/guardians of children entering kindergarten:

As you prepare for your summer schedule, please do not forget to schedule time for math and reading activities! Research is clear; students can experience “summer loss” that can be equivalent to three months of learning if they do not review learned skills throughout the summer. At Bishop McHugh, “summer loss” is something we can prevent with relevant summer reading and math activities!

This past school year, our students have deepened their understanding of many mathematical topics and have learned new skills and concepts. In order to maintain these skills, it is important that students have opportunities to refresh and practice math and language arts skills throughout the summer weeks.

Students are encouraged to utilize the following programs, with parental/ guardian supervision, to practice skills, enrich and challenge themselves.

Starfall.com

Abcya.com

Writing Wizard (iPad app)

EPIC (iPad app)

Moose Math (iPad app)

Additionally, above is a fun book to read with your child. Please also have your child pick up books that they enjoy, and “read” to you.

If you have any questions, or need more enrichment, please do not hesitate to contact us at:
